Center for Communications Research, Princeton

https://ccr-princeton.org

The Center for Communications Research, Princeton (CCR Princeton) is seeking new permanent research staff members in mathematics, statistics, physics, computer science, engineering, data science, and related fields to join our team.

Who We Are

CCR Princeton and its sister institutions, CCR La Jolla and CCS Bowie, form the Center for Communications and Computing, a federally funded research and development center (FFRDC) that is a division of the Institute for Defense Analyses (IDA). We work under a long-term contract to the National Security Agency to address scientific problems related to its mission.

We are a collaborative research institution looking to add self-motivated colleagues who like working on hard problems. Solutions often come from interdisciplinary collaboration, drawing on knowledge from mathematics, computer science, statistics, and signals analysis. Some projects require deep and sophisticated mathematics, others the latest computational technologies, and many require both.

How We Work

We have a shared-credit environment and a flat organizational structure. Collaboration is encouraged by an "open door" policy, informal conversations at daily tea, regular seminars, and easy access to spontaneous discussion sessions. The result is small, flexible working groups, with researchers free to choose what to work on according to their interests and expertise.

Each summer we hold an intensive ten-week program, SCAMP (Summer Conference on Applied Mathematical Problems), where researchers from academia, government, and industry come in to collaborate with our research staff on focused problems that change from year to year.

Rather than recruiting in specific subfields, we are looking for creative Ph.D.s who will help build on the body of knowledge in the external and internal literature. In

addition to internal work, we encourage continued academic research, and support travel to both internal and external conferences.

Location and Requirements

CCR Princeton is located in Princeton, New Jersey. We maintain close relations with Princeton University and the Institute for Advanced Study, both of which are nearby. Princeton is a bikeable, cosmopolitan town with excellent schools, high-quality options for dining and the arts, and easy access to New York and Philadelphia.

You must be a US citizen and be able to obtain an appropriate security clearance, which we will sponsor. Researchers may be able to begin work without a security clearance, performing unclassified or academic work while awaiting clearance. The start date for this position is flexible.

Benefits and How to Apply

CCR Princeton offers a competitive salary and excellent benefits, including moving expenses, medical and dental insurance, 11% contribution towards an employee's retirement plan (403(b)), HSA or FSA, life and disability insurance, and an on-site gym. Our work schedule is extremely flexible and offers a healthy work-life balance with generous vacation time.

To apply, please use MathJobs.org and submit a cover letter, an AMS cover sheet, CV, a research statement, and three letters of recommendation from people who can speak knowledgeably about your research and/or problem-solving abilities. Applications received by November 17, 2024, will receive full consideration, but those received after that date will still be accepted.

IDA is an equal opportunity employer committed to providing a working environment that is free from discrimination on the basis of race, color, religion, sex (including pregnancy and gender identity), sexual orientation, national origin, age, disability, status as a protected veteran, marital status, genetic characteristic, or any other legally protected condition.

Please submit the following items online at www.MathJobs.org for a complete application:

- Cover Letter
- AMS Cover Sheet
- Curriculum Vitae
- Research Statement
- Three Reference Letters (to be submitted by the reference writers on MathJobs.org)
